

# UNIQUE QUEUE APPLICATION

## PROJECT PRESENTATION FOR SOFTWARE ENGINEERING

Süleyman GÖLBOL 76210123

Arash Ziaee 76210148

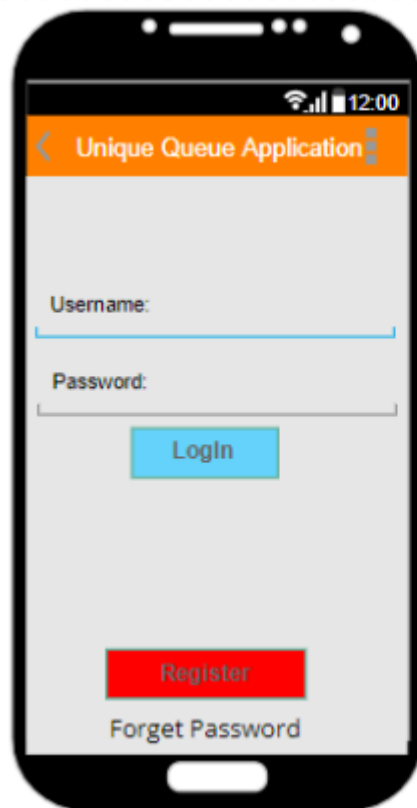

- 
- ✘ After COVID-19 every municipal organization, company etc., they are trying to have their website or system for making online appointment booking.
  - ✘ If every company has their own way of having an appointment, this is going to be so confusing for most of the people to manage their appointments, to use different applications with different interfaces.

# BRIEF SOLUTION

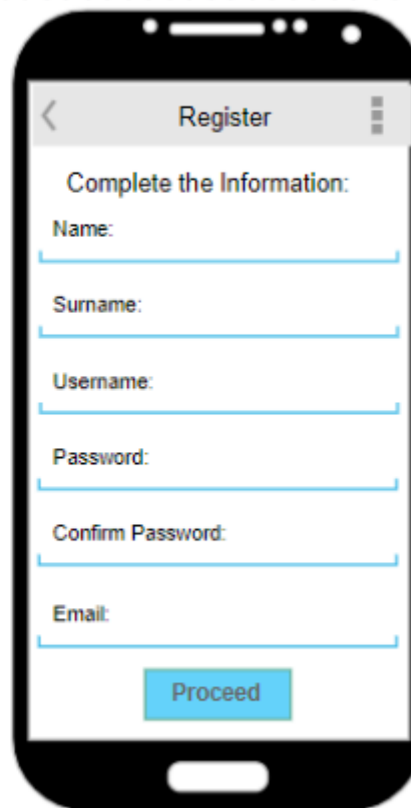

---

- ✖ So, imagine many organizations or companies have agreement with this application. One application has connection with each of these companies, so it makes it easier to get appointment from anywhere with just one application.
- ✖ Our solution is to design an application that collects every essential information (reservation, e-mails, etc...) in a user-friendly environment. So, every user can easily have access and it is not going to be so confusing for people.

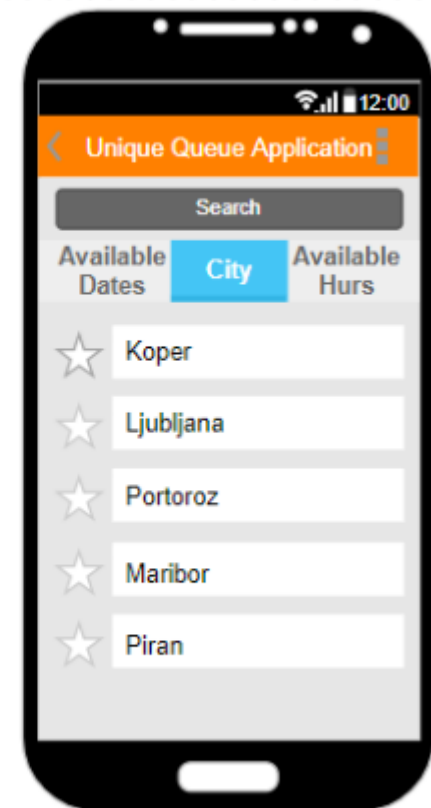

# FINAL OUTCOME

Mobile app login screen. The status bar at the top shows signal strength, battery level, and the time 12:00. The title bar is orange and contains a back arrow, the text "Unique Queue Application", and a menu icon. The main content area is light gray and contains two input fields: "Username:" and "Password:". Below the password field is a blue "Login" button. At the bottom, there is a red "Register" button and a "Forget Password" link.

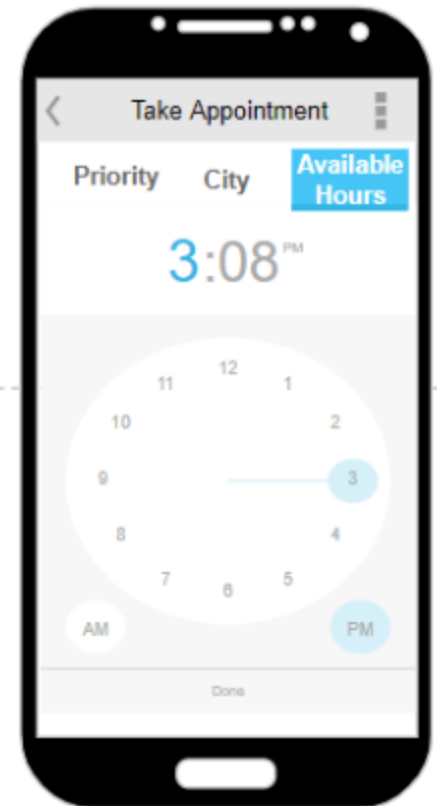

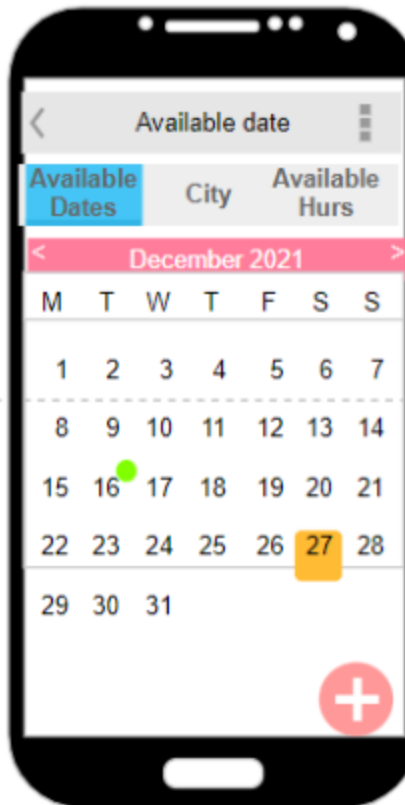

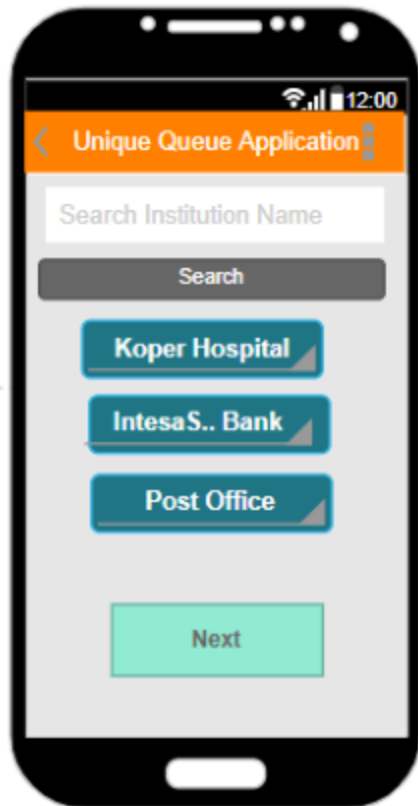

Mobile app registration screen. The title bar is gray and contains a back arrow, the text "Register", and a menu icon. The main content area is white and contains the text "Complete the Information:". Below this are five input fields: "Name:", "Surname:", "Username:", "Password:", and "Confirm Password:". At the bottom is a blue "Proceed" button.

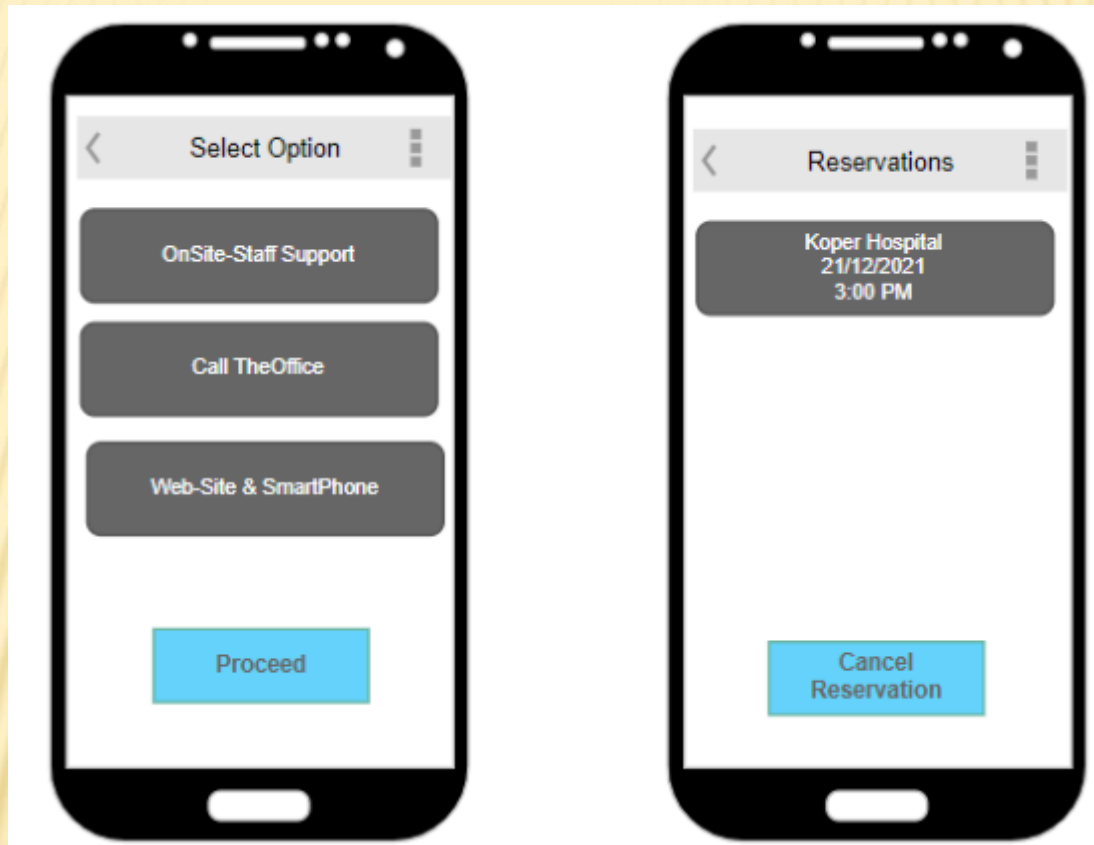

Mobile app city selection screen. The status bar at the top shows signal strength, battery level, and the time 12:00. The title bar is orange and contains a back arrow, the text "Unique Queue Application", and a menu icon. The main content area is light gray and contains a "Search" button. Below the search bar are three tabs: "Available Dates", "City" (which is highlighted in blue), and "Available Hurs". Below the tabs is a list of cities, each with a star icon and a text input field: "Koper", "Ljubljana", "Portoroz", "Maribor", and "Piran".

# COOPERATION WITH TEAMMATE

---

- ✗ Our group contains 2 members.
- ✗ Even though this had some disadvantages, it was also an advantage for us while cooperating.
- ✗ Another advantage is me and my teammate are flatmates.
- ✗ (Because of we are both Erasmus Students, possibility of accommodating the same house was bigger. )
